

MAHAN MIZANI

JUNIOR SOFTWARE ENGINEER

OBJECTIVE

Junior Software Engineer with hands-on experience across DevOps and CI/CD automation, relational database design, and full-stack web development (TypeScript, JavaScript, HTML/CSS, Django). Skilled in building structured, data-driven systems and automating deployment workflows with tools like Jenkins, Docker, and Git. Eager to join a collaborative engineering team where I can apply this versatile technical foundation while continuing to grow in backend systems and AI-related technologies.

PROJECTS

FLEXAIR – FLIGHT BOOKING & MANAGEMENT APPLICATION

- Built a data-driven flight booking platform using advanced SQL (queries, views, functions, triggers).
- Technologies: SQL (PostgreSQL / PL/pgSQL), Supabase (BaaS), HTML/CSS, SwiftUI, Flask, Cloud Platform

UNIVERSITY EVENT MANAGEMENT SYSTEM

- Built a web-based system to manage events, registrations, and participants, focusing on structured relational data and scalable backend workflows.
- Technologies: Django, React, Node.js, TypeScript, Tailwind, MongoDB, Chatbot Integration

CI/CD MONITORING DASHBOARD

- Built a real-time Jenkins CI/CD dashboard visualizing build results and pipeline health via the Jenkins REST API, updating live every 10 seconds.
- Technologies: HTML5, CSS3, JavaScript, Chart.js, Jenkins API

PORTFOLIO

- Designed and built a fully responsive personal portfolio site from scratch to showcase projects, education, and skills.
- Technologies: HTML5, CSS3, Git, GitHub Pages
